PRIVILEGED IDENTITY MANAGEMENT

Managed Services | Implementation | Consulting

WE MANAGE

PRIVILEGED IDS

Privileged Identity Management (PIM) technology addresses the issues surrounding the security of privileged accounts, viz. accounts with admin-level permissions, which the multitude of systems within any organization will natively have, e.g. an admin account is automatically created when an operating system or database is installed.

These privileged accounts have to be safeguarded and monitored for activity both by insiders as well as malicious outsiders, who could infect the entire network with malware and hold the entire organization at ransom.

PRIVILEGED IDENTITY MANAGEMENT

Privileged Identity Management (PIM) Managed Services and Implementation Solutions enable enterprises to control access to privileged IDs, while meeting HIPAA and PCI auditing requirements

Regulations COMPLIANT

Address the safety and tracking needs for companies who need to comply with regulations such as HIPAA 45 § 164.308(1)(D), PCI-DSS 10.2, and other industry regulatory requirements

Ease of MANAGEMENT

Manage the discovery, authentication, authorization, triggered password changes, auditing, compliance reporting, and access controls for privilege accounts

MEASURED and MONITORED

Safeguarded and monitored for activity both by insiders as well as malicious outsiders, who could infect the entire network with malware and hold the entire organization at ransom

Privileges are TIME-BOUND

Enable privileged users to check-out access and allow only specific privileges for a short time window, and synchronize the password changes with interdependent accounts to avoid disruptions to business

HOW ISSQUARED™ PIM SERVICES WORK
And we can also consult and implement tailor-made solutions!

ISSQUARED™ has been consulting to the world's best companies since 2010 on implementing and managing the optimal software that meet's a client's PIM requirements.

ISSQUARED™ has partnerships with the best PIM software vendors, some even SaaS-based, including Leiberman Software, CA Technologies, CyberArk, and others in the Forrester Wave™ 2016 for Privileged Identity Management.

PIM SOFTWARE STRATEGY
Selecting the right PIM software solution that meets your specific needs

IMPLEMENTATION STRATEGY
The best people, process, plan to implement the PIM software selected

CONNECTORS DEVELOPMENT
Build connectors to synchronize password changes to avoid business disruption

MANAGED PIM SERVICES
Provide 24x7 global PIM Managed Services to Fortune 500 clients and track for audits

MONITOR PIM ACCESS
Monitor privileged account access and usage, respond to requests for access

REMEDIATE BREACHES
Work with the internal security team in a manner to comply with regulations
